# Beyond the Blog

WordPress as a comprehensive CMS  
for media organizations

**Stephen Tiszenkel**

President

Hammerhed Content Management Solutions

---

Who am I?  
Why am  
I here?

## Stephen Tiszenkel

- Digital product professional for 20+ years
- WordPress user and developer since 2003
- Birthday buddy with WordPress
- Host of The New England Tech Podcast

[www.tiszenkel.com](http://www.tiszenkel.com)

# Where I've been

**Hammerhed**

Content Management Solutions

## Channel One News

- Founded in 1990
- Shown in schools to grades 3-12
- Alumni include Anderson Cooper, Maria Menounos, Serena Altschul, Scott Evans, Steven Fabian
- 6 million daily viewers in 2008

—

**The big problem:** Channel One's business model was out of date, and the technology didn't support the new business model

# The old business model

- 19-inch CRT televisions in every classroom
- Show beamed to schools via satellite
- All classes required to watch show more than 90% of school days
- 10 minutes of news, 2 minutes of ads
- Digital focus on students

# The evolved business model

- Teachers show program via interactive whiteboard or projector
- More classes watch without ads
- Classrooms or schools pay for curriculum package
- Curriculum includes daily interactive teaching tools and access to video archive
- Increased digital focus on teachers

# The technology

- Multiple content-management systems inherited from different corporate parents
- Difficult to create new templates/content types
- Hierarchical information architecture
- No paywall

—

**One obvious solution ...**

Drupal™

**(An important note)**

- Already in limited use on site
- In-house expertise
- Easy for editors
- Easy for developers
- Larger community
- *What about me?*

- No existing infrastructure
- No developers
- Steeper learning curve
- Less-elegant UI
- Smaller community
- *What about me?*

**“JUST A BLOGGING PLATFORM”**

# The prestige argument

The New York Times

Channel One News

**“JUST A BLOGGING PLATFORM”**

(But the prestige argument would be more convincing today)

# The innovation argument

QUARTZ

---

**Who?**

—

**Let's build it!** You need the skills or the resources, but WordPress makes it fast and easy

# Education Nation

- My own server
- Developed outside of work hours
- BuddyPress and registration system
- Multisite
- Access control
- Quizzes
- Slideshows
- Social elements/groups
- Content uploads
- **No blog elements**

—

**Success!** And now for the  
hard part ...

# The biggest challenges

- Multiple post types with major differences between them
- Wire content
- Hybrid automation/editorial control

(Other challenges covered in eight-hour version of this talk)

—  
**Combination of free plugins,  
premium plugins and  
custom development**

Challenge:

**Multiple Post Types**

**Solution:**

# **Custom Post Type UI**

<https://wordpress.org/plugins/custom-post-type-ui/>

## Add/Edit Post Types

[Add New Post Type](#)[Edit Post Types](#)[View Post Types](#)[Import/Export Post Types](#)Select: Videos ▾

### Basic settings ▲

**Post Type Slug \***

*The post type name/slug. Used for various queries for post type content.*

Slugs should only contain alphanumeric, latin characters. Underscores should be used in place of spaces. Set "Custom Rewrite Slug" field to make slug use dashes for URLs. DO NOT EDIT the post type slug unless also planning to migrate posts. Changing the slug registers a new post type entry.

 Migrate posts to newly renamed post type?**Plural Label \***

*Used for the post type admin menu item.*

**Singular Label \***

*Used when a singular label is needed.*

### Additional labels ▲

**Post Type Description**

*Perhaps describe what your custom post type is used for?*

**Menu Name**

*Custom admin menu name for your custom post type.*

## Settings

**Public**  True (CPTUI default: true) Whether or not posts of this type should be shown in the admin UI and is publicly queryable.

**Publicly Queryable**  True (default: true) Whether or not queries can be performed on the front end as part of parse\_request()

**Show UI**  True (default: true) Whether or not to generate a default UI for managing this post type.

**Show in Nav Menus**  True (CPTUI default: true) Whether or not this post type is available for selection in navigation menus.

**Show in REST API**  False (default: false) Whether or not to show this post type data in the WP REST API.

**REST API base slug**

**Has Archive**  False (default: false) Whether or not the post type will have a post type archive URL.

If left blank, the archive slug will default to the post type slug.

**Exclude From Search**  False (default: false) Whether or not to exclude posts with this post type from front end search results.

**Capability Type**

The post type to use for checking read, edit, and delete capabilities.

**Hierarchical**  False (default: false) Whether or not the post type can have parent-child relationships.

**Rewrite**  True (default: true) Whether or not WordPress should use rewrites for this post type.

**Custom Rewrite Slug**

Custom post type slug to use instead of the default.

## Add/Edit Taxonomies

Add New Taxonomy

**Edit Taxonomies**

View Taxonomies

Import/Export Taxonomies

Select: Grades ▾

### Basic settings ▲

#### Taxonomy Slug \*

The taxonomy name/slug. Used for various queries for taxonomy content.

Slugs should only contain alphanumeric, latin characters. Underscores should be used in place of spaces. Set "Custom Rewrite Slug" field to make slug use dashes for URLs. DO NOT EDIT the taxonomy slug unless also planning to migrate terms. Changing the slug registers a new taxonomy entry.

Migrate terms to newly renamed taxonomy?

#### Plural Label \*

Used for the taxonomy admin menu item.

#### Singular Label \*

Used when a singular label is needed.

#### Attach to Post Type \*

Add support for available registered post types. At least one is required.

- Posts (WP Core)
- Pages (WP Core)
- Media (WP Core)
- Recipes
- Videos

Save Taxonomy

Delete Taxonomy

## Settings

### Public

True ▾ (default: true) Whether or not the taxonomy should be publicly queryable.

### Hierarchical

False ▾ (default: false) Whether the taxonomy can have parent-child relationships.

### Show UI

True ▾ (default: true) Whether to generate a default UI for managing this custom taxonomy.

### Show in menu

True ▾ (default: value of show\_ui) Whether to show the taxonomy in the admin menu.

### Show in nav menus

True ▾ (default: value of public) Whether to make the taxonomy available for selection in navigation menus.

### Query Var

True ▾ (default: true) Sets the query\_var key for this taxonomy.

### Custom Query Var String

(default: taxonomy slug). Query var needs to be true to use.

Sets a custom query\_var slug for this taxonomy.

### Rewrite

True ▾ (default: true) Whether or not WordPress should use rewrites for this taxonomy.

### Custom Rewrite Slug

(default: taxonomy name)

Custom taxonomy rewrite slug.

### Rewrite With Front

True ▾ (default: true) Should the permastruct be prepended with the front base.

### Rewrite Hierarchical

False ▾ (default: false) Should the permastruct allow hierarchical urls.

### Show Admin Column

False ▾ (default: false) Whether to allow automatic creation of taxonomy columns on associated post-types.

### Show in REST API

False ▾ (default: false) Whether to show this taxonomy data in the WP REST API.

AP Content Slot

Video

# Challenge:

## Wire Content

# Challenge: **Wire Content**

- Many media organizations rely on wire content, most commonly from AP
- AP content is very expensive, so critical mass of users doesn't exist to support plugin development

## Solution: **NNTN**

- Custom-built plugin
- Imports AP content at user-defined intervals
- All content automatically categorized/tagged
- Runs on *separate* WordPress instance
- Photos only imported on first page view
- Posts can be frozen

**Challenge:**

**Hybrid Automation/  
Editorial Control**

# Solution: **AP Content Slots**

- Uses Advanced Custom Fields
- Theme built to fill slot automatically with latest post in AP category
- Editor can require or exclude tags
- Other stories used on page automatically excluded
- **Variation:** Latest blog post

—

**43** plugins

**17** templates

# Other Key Plugins

- **Access control:** Wishlist Member  
<https://member.wishlistproducts.com/>
- **Content cleanup:** Post Expirator  
<https://wordpress.org/plugins/post-expirator/>
- **Account Management:** Theme My Login & Cimy User Extra Fields  
<https://wordpress.org/plugins/theme-my-login/>  
<https://wordpress.org/plugins/cimy-user-extra-fields/>
- **Slideshows:** Royal Slider  
<http://dimsemenov.com/plugins/royal-slider/wordpress/>
- **URLs:** Simple 301 Redirects & Custom Permalinks\*  
<https://wordpress.org/plugins/simple-301-redirects/>  
<https://wordpress.org/plugins/custom-permalinks/>

**\*Note:** Custom Permalinks plugin does not work when Edit Flow plugin is enabled
